## General Rules

*Optimized Profile Descent: An increasing number of airports require planes to "glide" down from cruising altitude with their engines close to idle to conserve fuel and reduce noise. The new, smoother landing approach is "a gracious slide through the clouds," according to one flight reviewer.*

### Green (10 )

Kerosene starts at 20, you may not place dice values > 5 in the Engines.

### Yellow (7 )

Kerosene starts at 15, you may not place dice values > 5 in the Engines.

### Red (5 )

Kerosene starts at 15, you may not place dice values > 4 in the Engines.

### Black (2 )

Kerosene starts at 10, you may not place dice values > 4 in the Engines.
